VIGILANCE SANITAIRE

Info sur la peste porcine Africaine

La France est indemne de cette maladie hémorragique, qui touche les Suidés (Porc et Sanglier) et provoque souvent la mort des animaux touchés. Elle est présente dans les pays d'Europe de l'Est ainsi qu'en Russie, Ukraine, Biélorussie...

Ce virus survit très longtemps dans la matière organique.

C'est pourquoi tous les réseaux concernés sont alertés : éleveurs de porcs, éleveurs de sangliers, transporteurs, chasseurs, voyageurs etc..

Comment prévenir le risque d'introduction et la propagation éventuelle du virus en France quand on est chasseur

- Lors de la pratique de la chasse :

- ♦ Détecter et signaler toute mortalité anormale de sanglier.
- ♦ Dans les cas de lâchers de sanglier (autorisation préfectorale), aucun animal ne doit provenir des pays contaminés.
- ♦ Dans le doute se renseigner auprès des services vétérinaires de son département (DD(CS)PP) et leur signaler toute introduction de sangliers en provenance des pays contaminés.

- Lors de voyages de chasse en Europe de l'Est, Ukraine, Biélorussie, Russie, Mongolie :

- ♦ Nettoyer soigneusement et minutieusement son matériel avant de revenir en France (matériel de chasse, vêtements, chaussures et voiture le cas échéant).
- ♦ Ne pas rapporter de viande ou de produits (charcuterie) à base de sanglier ou de porc, ou de trophées de chasse.
- ♦ Eviter tout contact avec les porcs ou sangliers dans les zones contaminées.

Merci pour votre vigilance.

Ne jetez pas vos douilles et cartouches aux ordures ménagères !

**Adoptez le bon réflexe :
en fin de battue, déposez vos cartouches
usagées dans le sac prévu à cet effet.**

Une filière de valorisation de ces cartouches usagées, mise en place par les Fédérations des Chasseurs d'Occitanie

POURQUOI UN REGISTRE DE BATTUES ?

Ce registre est un outil d'aide à l'organisation des battues. Il permet d'identifier le rôle de chacun pour chasser en toute sécurité. Néanmoins, il convient de toujours se référer au schéma départemental de gestion cynégétique et/ou aux arrêtés préfectoraux en vigueur dans le département.

L'exposé des règles d'organisation et de sécurité doit être fait avant chaque départ en battue.

Une battue correspond à une page du registre, sur laquelle chaque participant présent émarge et reporte son numéro (attribué en début de saison de chasse).

Le **responsable de la société** peut désigner un ou plusieurs **chefs de battue** pour le suppléer. Cette(ces) personne(s) désignée(s) doit(vent) avoir reçu et accepté cette délégation.

QUEL EST LE RÔLE DU CHEF DE BATTUE ?

Il possède le registre de battues et doit :

Au début de la saison de chasse

Enregistrer le nom et le prénom de chaque participant, leur n° de titre validation du permis de chasser et, le cas échéant, celui de leur police d'assurance.

Avant chaque battue

Remplir le registre de battues pour chaque jour de chasse (date, responsable,...). Désigner les espèces et le nombre d'animaux susceptibles d'être tiré ainsi que les armes et/ou munitions autorisées.

Inscrire les noms et prénoms des chefs de lignes éventuels et rappeler leur rôle.

Inscrire les noms, prénoms, n° de police d'assurance et de validation des invités.

Faire émarger tous les chasseurs présents à la battue.

Définir la zone chassée et l'affectation des postes ; n'hésitez pas à vous aider d'une carte du territoire.

Donner les consignes de sécurités.

Après la battue:

Inscrire le résultat de la battue et les observations d'animaux.

S'informer des tirs réalisés, auprès des postés ou des chefs de ligne éventuels.

En cas de blessure d'un animal, vérifier et rechercher les indices avec le tireur.

Baliser le lieu pour faciliter une recherche au sang et faire appel à un conducteur de chien de sang.

CONSEILS DE SÉCURITÉ

À RAPPELER AVANT CHAQUE DÉPART DE BATTUE

1- Chaque participant est tenu d'être présent au lieu de rassemblement et doit être inscrit sur le registre de battues, tenu par le responsable ou son délégué.

2- L'aller et le retour au poste doivent se faire avec l'arme non approvisionnée, et de préférence placée sous étui.

3- Une fois posté, se signaler à ses voisins et repérer la zone de tir sécurisée.

Ne pas tirer à l'intérieur de l'enceinte (sauf autorisation précisée par le chef de battue ou le chef de ligne).

4- Approvisionner et charger son arme au signal de début de battue.

5- S'assurer que l'action de tir, s'effectue sans risque dans l'environnement immédiat.

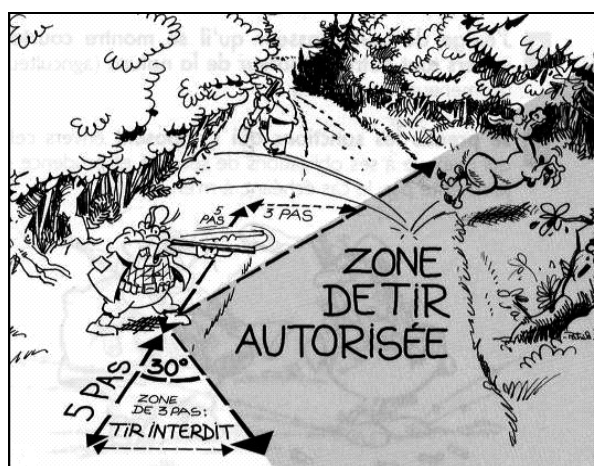

6- Identifier l'animal avant de tirer.

7- Le tir doit être fichant.

8- Ne pas quitter son poste avant le signal de fin de battue.

9- Au signal de fin de battue, décharger immédiatement son arme.

10- Se signaler à ses voisins avant de quitter son poste.

CONSEILS DE SÉCURITÉ SPÉCIFIQUES COMPLÉMENTAIRES :

.....

.....

.....

.....

.....

.....

.....

Précisions supplémentaires pour le Gers

Une fois posté, évaluer l'angle des 30° de part et d'autre de son poste et s'y interdire d'y tirer. L'angle est formé par 5 pas sur le côté et 3 pas perpendiculaires

Garder le canon toujours dirigé vers le sol ou le ciel

Ne jamais se déplacer au cours de la battue même pour aller chercher un animal mort ou blessé et rester à son poste jusqu'au signal de fin. Il est absolument interdit de quitter sa place en cours de battue.

Eviter les tirs à grande distance (maximum 35 m avec un fusil et 50 m avec une carabine).

Interdiction de poursuivre les animaux en voiture.

Dans le cas du chevreuil, interdiction de le déplacer tant qu'il n'est pas muni de son bracelet de marquage.

Pour le sanglier, tir à balle obligatoire. Pour le chevreuil, tir à balle ou à plomb n°1 ou n°2.

Préconisation début/fin de traque

La chasse en battue se conçoit difficilement sans annonce. Même s'il vous appartient de choisir les codes qui vous conviennent, les codes habituellement sonnés sont :

Début de traque : 1 coup long

Fin de traque : 3 coups longs

BILAN SAISON 2018/2019

A retourner obligatoirement à la Fédération des chasseurs avant le 10 Mars 2019

Dispositions encadrant la chasse en battue au grand gibier et au renard :

Concernant les dispositions encadrant la chasse en battue au grand gibier et au renard, le S.D.G.C prévoit que la chasse en battue comporte 3 tireurs au minimum et que le registre de battue soit impérativement rempli et signé par tous les participants, selon le modèle de la F.D.C du Gers.

En action de chasse en battue :

Le port d'un vêtement à dominante orange fluorescent recouvrant le buste est obligatoire pour tous les participants (y compris les non chasseurs), le port du couvre-chef est facultatif. Cette signalisation fluorescente est de la seule responsabilité individuelle de la personne participant à la battue.

Les consignes de sécurité doivent obligatoirement être données avant la battue par le chef de battue et scrupuleusement respectées par les participants présents et ayant signés le registre de battue. Le tir en direction de la traque est subordonné aux directives du chef de battue et/ou du chef de ligne.

Concernant les dispositions encadrant la chasse en battue au grand gibier et au renard, le S.D.G.C prévoit l'utilisation d'un minimum de 3 trompes de chasse ou piboles par battue avec un minimum de une par ligne de posté pour signaler le début et la fin de traque et/ou battue.

L'action de chasse débute et se termine respectivement lorsque le signal de début et de fin de battue et/ou traque est donné conformément aux dispositions qui précèdent. Pour se rendre et pour quitter le poste de tir, les déplacements devront être effectués avec une arme vide de toute munition, conformément aux dispositions qui précèdent.

La chasse à la « rattente » qui consiste à se placer en des points stratégiques dans des conditions de tirs dangereuses vis-à-vis d'autres chasseurs, à portée d'armes, à l'attente du passage du gibier poussé par une autre action de chasse organisée par d'autres chasseurs sur des territoires voisins, sans accord et/ou concertation préalables est fortement déconseillée car, outre le fait qu'elle est irrespectueuse d'autrui et du gibier, elle s'avère particulièrement dangereuse.
